SUMMARY

Results-driven Data Analyst with expertise in Python, SQL, Microsoft Power BI, Tableau, Microsoft Excel, and Pandas. Delivered 4 end-to-end data analysis and reporting pipelines on 10M+ row government datasets — translating stakeholder requirements into KPI dashboards and data-driven business insights across fintech, road safety, public health, and job market domains. Tableau Certified · SQL Certified · DataCamp DA Certified.

PROJECT EXPERIENCE

UPI Ecosystem & Financial Inclusion Intelligence Dashboard | [GitHub](#)

Jan 2025 – Mar 2026

Data Analyst — Independent Project

- Built an end-to-end analytics pipeline ingesting 77 months of NPCI/RBI government CSVs across 13 verified sources (Nov 2019–Mar 2026) — cleaned, feature-engineered 18 metrics, and modeled raw governmental data into a structured PostgreSQL analytical layer (4 tables, 5 SQL queries) for downstream Power BI reporting
- Identified 12 underserved states (MP, Assam, Bihar leading) holding 255.9M Jan Dhan accounts at below-average deposit rates — quantified INR 12,417 Crore (~\$1.49B USD) in untapped potential
- Designed 4-page Power BI dashboard covering UPI growth, ecosystem health, and inclusion KPIs — delivering data-driven, stakeholder-ready insights across state-level digital penetration

India Road Accident Pattern Intelligence — Highway Risk Analytics | [GitHub](#)

Aug 2024 – Dec 2024

Data Analyst — Independent Project

- Built an analytics pipeline on 487,707 accident records across 36 states — ingested 15 MoRTH CSVs and extracted 2024 state-wise, time-of-day tables into PostgreSQL (10 tables, 5 SQL queries) for Power BI reporting
- Engineered fatality rate normalization revealing Bihar (0.81) as 10x higher risk than Kerala (0.08); Pearson $r=0.816$ ($p<0.0001$), OLS $R^2=0.666$ confirmed volume as primary driver
- Segmented risk across 51 cities, flagging Ludhiana (0.80) and Asansol-Durgapur (0.71) as top corridors; Prophet model projected 200,000+ fatalities by 2026–27 (+22.3% from 2019)

India Analytics & AI Job Market Pulse | [GitHub](#)

Sep 2024 – Jan 2025

Data Analyst — Independent Project

- Built a live job market intelligence tool scraping 500+ weekly postings from Naukri, LinkedIn, and Internshala — tracking skills, salaries, and hiring trends across 25+ DA/DS/ML/AI titles in real time
- Integrated Groq LLM to auto-extract and normalize demanded skills from unstructured JDs across 15+ cities — zero manual labelling, fully automated weekly refresh
- Streamlit dashboard revealed SQL, Python, and Power BI in 78% of DA postings; surfaced top 5 ROI skills and salary benchmarks by city and role type

India Air Quality & Public Health Correlation Analysis | [GitHub](#)

May 2024 – Aug 2024

Data Analyst — Independent Project

- Built a public health analytics system correlating CPCB AQI data with NFHS health records across 20+ Indian cities — cleaning and standardizing 10M+ rows of multi-source data
- Applied SciPy Pearson correlation between PM2.5/PM10 and respiratory disease incidence, identifying 3 urban clusters with AQI above 200 and $2.8\times$ the national hospitalization rate
- Built seasonal AQI heatmaps and health-risk KPI scorecards in Power BI for 20+ cities — delivering data-driven, stakeholder-ready emission-reduction recommendations

TECHNICAL SKILLS

Languages: Python, SQL

Databases: PostgreSQL, SQLite, MySQL

BI & Data Visualization: Microsoft Power BI, Tableau, Microsoft Excel, Plotly, Streamlit, DAX, Power Query

Libraries: Pandas, NumPy, SciPy, Scikit-learn

Tools: Selenium, BeautifulSoup, Camelot, Git, GitHub, Jupyter Notebook, VS Code, Google Colab

Concepts: Data Analysis, Business Intelligence, ETL, EDA, Data Cleaning, Statistical Analysis, KPI Development, Reporting, Feature Engineering, Web Scraping, LLM Integration

EDUCATION

Bharati Vidyapeeth Deemed to be University (BVDU)

Pune, India

Bachelor of Computer Applications (BCA) – CGPA: 8.61/10

Aug. 2023 – May 2026

- **Relevant Coursework:** Database Management Systems, Statistical Methods, Data Structures & Algorithms, Python Programming, Data Analysis & Visualization

CERTIFICATIONS

Python Data Associate Certification | *DataCamp*

June 2026

SQL Associate Certification | *DataCamp*

June 2026

Data Analyst Career Certification | *DataCamp*

2026
